Augest was a grate month for me becuase I got to see so many diffrent ups in pakistan. Many people dont know that the locally made ups can harm their delecate electronic items like computers, kitchen appliances, and tv's etc. Most households with high power consumption opt for over 1200w ups (mostly 2000 watts or 1500 watts ups) in pakistan. Here are some of the best ups in this category. First we have apc smart-ups 2200va (1980w). Its a rack type 1980w apc ups that is more than enought to run most home appliances. It has the power output to run a 1 ton inverter ac and some other appliances not exceeding 600 watts accumulated. The best thing about this device is the quality you get, but you wont be able to get any warranty as the company doesnt operate oficially in the local market. However, imported devices of this company are trusted by many. Other top ups include eco star e-1440i (1440w), it's a 1500w ups that can provide quick backup to power most of your appliances excluding acs and fridges etc. Its official availability is not confirmed nowadays but you may find it from some sellers. Average EcoStar UPS (E-1440i) price in Pakistan ranges from Rs.30,000 to Rs.40,000. Inverex Veyron 1.2 kW MPPT Solar Inverter, capable of serving as a UPS, is priced around Rs.70,000. Crown CMU/2000 (1200W), with its warranty and modern features, competes in the Pakistani market for around Rs.30,000 to Rs.40,000. It's equipped with features that outshine local models. The Homage UPS Inverter HVS-1214-SCC (1000W) stands as a popular choice among 700W to 1000W category seekers, available at a price of approximately Rs.54,000. This option comes with warranty and can be repaired through the company, making it a reliable choice. APC Smart-UPS 1000VA (700W) is another contender in the market but its details are not explicitly provided, leaving room for further research and comparison among these options to find the best fit for specific needs. The APC 1000VA power backup device is a 700W unit ideal for households with low power consumption. It lacks warranty due to its mostly used condition, but can be purchased in box-packed condition at an additional cost. Key features and specs include: - Output power capacity: 700 Watts / 1000VA - Input voltage range: 151V – 302V (230V nominal) - Frequency: 47-63 HZ - Waveform type: Sine wave Pricing varies, with an average cost of Rs.25,000 to Rs.35,000. The article provides a table for calculating power usage and suggests some common home appliances' estimated power consumption. Wattages for reference: - Ceiling Fans ~80 - Amplifier ~450 - Camera ~10 - Door Bell ~10 Please note that actual power consumption may vary based on factors like appliance type and usage. Availability and pricing of the UPS device are uncertain due to import restrictions and economic conditions.
